

Saratoga High School Concessions & Restrooms

The new Enviroplex manufactured concession building, multi-fixture restroom and ticket building were the final pieces needed to complete the stunning new athletic fields at Saratoga High School for the Los Gatos Saratoga Joint Union High School District. The project was a collaborative effort between the school district, Verde Design Group, and Enviroplex. The concession building includes dry storage and a custom floor plan designed to meet all of the requirements for the athletic program: Aluminum roll-up shutters with windows service the efficiently spaced sales area, and wrap around overhangs add protection from inclement weather.

Site applied three-coat stucco exterior gives the building a striking, polished look.

The multi-fixture men's and women's restroom building also includes a 13x10 ticket booth located on the north corner and welcomes visitors before entering the stadium. The restrooms are accessed from the playing field side of the grand entry. The finished exterior is also three-coat stucco, harmonizing the new facilities.

Key Building Features

- 1.5:12 pitched integrated roof with Kynar colored panels
- Aluminum roll-up shutters with serving windows
- Stainless steel countertops with pass through shelves and condiment counter
- Forbo Marmoleum flooring; welded seams
- Three compartment pot sink
- One compartment prep sink
- Hand sink
- Mop sink
- Floor sink
- Floor drain with trap primer
- Grease trap
- Multi-fixture men's and women's restrooms with low flow toilets and sinks
- 3-coat stucco exterior
- Stucco flange welded frames
- Low and no V.O.C. (Volatile Organic Compounds) paints and sealant materials
